Name: _____

Grade / Class: Grade 5

GRADE 5 – TEST 1

Section A: English Language

1. Reading Comprehension

Read the passage carefully and answer the questions.

A river begins as a small stream high in the mountains. As it flows downhill, it gathers water from rain and other streams. Along its journey, the river provides water for plants, animals, and people. Many cities are built near rivers because they support farming, travel, and trade.

a) Where does a river usually begin?
b) What adds more water to a river as it moves forward?
c) Name two ways rivers help humans.
d) Why do cities often develop near rivers?

---

2. Vocabulary

Write one word for each description.

a) A word that means almost the same as "quick"
b) A word that is the opposite of "ancient"
c) A word used to name a place, person, or thing
d) A word that describes an action

---

3. Grammar

a) Identify the subject in this sentence:
"Tall trees covered the hillside."
