Name: _____

Grade / Class: Grade 5

GRADE 5 – TEST 2

Section A: English Language

1. Reading Comprehension

Read the passage and answer the questions.

Many animals survive in harsh environments by changing their behavior. Some animals search for food at night to avoid heat, while others store supplies for colder seasons. These survival methods help living beings adapt to their surroundings and remain safe.

a) When do some animals search for food?
b) Why do certain animals store supplies?
c) What does the word "adapt" mean in this passage?
d) How do survival methods help animals?

---

2. Vocabulary and Word Study

a) Write a word that means "very large."
b) Write a word that describes how something feels.
c) Write a word formed by adding a prefix to "possible."
d) Write a compound word made from "sun" and another word.

---

3. Grammar and Language Use

a) Identify the verb in this sentence:
"The audience listened quietly."

b) Change this sentence into the past tense:
"They build a shelter."

c) Combine these sentences using a suitable connector:
"The path was narrow. We walked carefully."

---

4. Writing Task

Write a short paragraph explaining how reading books helps improve imagination.

Section B: Mathematics

5. Place Value and Operations

a) Write the number name for 906,215.
b) Find the difference between 8,402 and 3,789.
c) Write a number that is divisible by both 5 and 10.

---

6. Fractions and Percentages

a) Write 40 percent as a fraction.
b) Which fraction is larger: 7/10 or 2/5? Explain.
c) Write one fraction equal to 12/16 in simplest form.

---

7. Problem Solving

A farmer packs apples into boxes. Each box holds 24 apples. If there are 18 boxes:

a) How many apples are packed in total?
b) If 96 apples are sold, how many remain?

---
