12. **Correct the error: Each of the students have submitted their essays.**

Writing Skills

13. Write a formal letter requesting permission to organize a school debate.
14. Compose a short story based on the theme: “A Discovery in the Forest.”
15. Write a report describing a class field trip to a historical site.

Section B: Mathematics

Number Systems

16. Convert 0.625 to a fraction.
17. Find the LCM of 18 and 24.
18. A number is increased by 25% to become 50. Find the original number.

Algebra

19. Solve: $5x - 7 = 28$
20. Simplify: $8a - 3b + 4a + b$
21. Represent as an equation: "Three times a number decreased by five equals sixteen."

Geometry

22. Find the area of a triangle with base 14 cm and height 10 cm.
23. Define acute angle.
24. How many sides does a hexagon have?

Data Handling

25. Find the median of: 12, 15, 18, 22, 25
26. Which type of chart best represents percentages?
27. Why is data analysis important in research?

Measurement

28. Convert 3.5 kilometers into meters.
29. How many grams are in 2.75 kilograms?
30. If the temperature rises from 15°C to 22°C, what is the increase?

Section C: Science

Biology

31. **Name one function of the respiratory system.**
32. **How does photosynthesis benefit animals indirectly?**
33. **Explain the role of lymph in the human body.**

Physics

34. **Define force and give one example.**
35. **A car accelerates from 0 to 60 km/h in 10 seconds. Calculate the average acceleration.** ***(formula expected, numeric not required)***
36. **Give one example of a simple machine in daily life.**

Chemistry

37. **Name the states of matter.**
38. **What is a heterogeneous mixture? Give an example.**
39. **Identify one indicator used to test acids and bases.**

Environmental Science

40. **Mention one cause of water pollution.**
41. **How can renewable energy reduce environmental harm?**
42. **Define greenhouse effect.**

Section D: Social Studies

Geography

43. **Name two factors that influence climate.**
44. **What is the difference between latitude and longitude?**
45. **Why is topography important in city planning?**

History

46. **Name one invention from the ancient Egyptian civilization.**
47. **Explain the significance of the Silk Road.**
48. **Who were the philosophers in ancient Greece, and why are they remembered?**

Civics

49. **Define civic duty.**
50. **Mention one example of a social organization in the community.**

51. Why is voting important in a democracy?

Economics

52. Differentiate between goods and services.
53. Explain the term “opportunity cost.”
54. Give one example of international trade.

Section E: ICT / Computer Studies

Computer Basics

55. What is an output device? Give an example.
56. Name one operating system other than Windows.

MS Word

57. How can a header be added to a document?
58. Why do we use numbering in lists?

MS Excel

59. Write the formula to find the sum of cells C1 to C10.
60. What is conditional formatting used for in Excel?

Internet Awareness

61. Define phishing.
62. Mention one way to stay safe online.

Section F: Islamiyat

Quran and Hadith

63. Mention one teaching from the Quran about kindness to parents.
64. Quote or paraphrase one Hadith that emphasizes honesty.

Aqidah

65. Name one of the six articles of faith in Islam.
66. Why is belief in angels important?

Worship

67. State one condition for fasting in Ramadan.
68. What is the social purpose of Zakat?

Islamic Ethics

69. Explain why fairness is essential in daily life.
70. Give one example of gratitude in action.

Section G: Arts and Music

71. Name one technique used in watercolor painting.
72. Define rhythm in music.
73. How can arts help express emotions?

Section H: Health and Physical Education

74. Define endurance in physical fitness.
75. Name one individual sport.
76. Why is maintaining hygiene important for students?
77. Mention one team sport and its basic rule.
78. How does balanced nutrition support growth?
